

October 19, 1989

To: ✓ Edertho Leal-Quiros

Patent Disclosure:

Dated: September 25, 1989

Disclosure Numbers and Titles:

- 90UMC011 "Stigmatic (or double focus) EXB Analyzer"
- 90UMC012 "Hyperbolic Energy Analyzer"
- 90UMC014 "Pitch Angle Detector (PADE)"
- 90UMC015 "Variable Energy Analyzer - Modified (VEA)"

Congratulations on your discoveries! Scientific innovation is a very important part of the University's research mission, and the University acknowledges with gratitude your current contributions.

We received your disclosures on September 22, 1989. The next step for your disclosures is making marketing contacts. We will be sending the non-confidential information along with a confidentiality agreement for signature to companies in this area. The signing of that agreement will allow the forwarding of the complete disclosures.

Appropriate disclosures have been marked if they have already been published. In any communication with this office, please refer to the number assigned to your invention and listed above.

If you have any additional information or any questions, please don't hesitate to call me. These disclosures will be handled carefully and in a timely manner.

Sincerely,

Connie M. Armentrout
Coordinator
